SUMMARY

Artificial Intelligence and Data Science engineering student currently pursuing a B.Tech degree, with foundational skills in Python and SQL, Familiar with Snowflake, MySQL, and PostgreSQL, and eager to apply data and AI concepts to real-world projects.

EDUCATION

Karpagam College of Engineering Bachelor of Technology - Artificial Intelligence and Data Science, CGPA:8.33	Sep 2023 - Present
Holy Children Matric Hr Sec School Higher Secondary, Percentage:92.8	Jun 2021 - Mar 2023

WORK EXPERIENCE

- Python Intern** - BYTS Services India Private Limited | Jun 2024 – Jul 2024
- Successfully completed an internship focused on data analysis and problem-solving using Python.
 - Worked on real-world datasets to extract insights, improve data handling skills, and understand industry workflows.

PROJECTS

- Multi-Agent AI Stock Market Prediction Platform**
- Developed a multi-agent AI system for stock prediction, risk alerts, technical/fundamental analysis, portfolio optimization, and news impact assessment.
 - Orchestrated agents using an MCP Server with real-time coordination, behavioral insights, and automated decision workflows
- Solar-Hybrid Dewatering System with AI Digital Twin (SIH 2025)**
- Designed a solar-hybrid mine dewatering solution using DC-coupled architecture, AI Digital Twin, and TinyML-based predictive maintenance to ensure near-zero downtime and reduce OPEX and diesel dependency.
 - Enabled real-time monitoring and optimization using IoT sensors, weather data, and an OPEX (pay-per-use) model for ESG-compliant mining.
- Sales OS – Autonomous Sales Intelligence Platform**
- Developed an Agentic AI Sales OS using a multi-agent system and Digital Twins for intelligent lead scoring, engagement, and deal health monitoring.
 - Enabled explainable, real-time sales insights with autonomous decision-making, revenue forecasting, and human-in-the-loop controls.
- Aura Vision – Object Detection & Navigation Aid for the Blind**
- Built an edge-based object detection system using YOLO, MobileNet-SSD, OpenCV, and TensorFlow Lite for real-time obstacle detection.
 - Enabled low-latency audio guidance with directional and urgency-based alerts for safe navigation.
- SERNOVA – AI & IoT-Driven Pregnancy Care Monitoring Platform**
- Built an AI and IoT-powered pregnancy monitoring platform that analyzes maternal and fetal health data from connected devices to detect risks and provide personalized nutrition guidance.
 - Developed an agent-based decision system and interactive dashboard to enable continuous monitoring, adaptive care recommendations, and clinician-assisted interventions.

ACHIEVEMENTS

- Smartathon 2.0 L&T National Level Hackathon**, Special Mention
Neurobots National level Hackathon, IIT Palakkad, Finalist
Decodex 2026 National Level Hackathon, NLDIMSR, Finalist
Smart India Hackathon 2025, Shortlisted

TECHNICAL SKILLS

- Languages/ Development:** Python, Java, SQL, HTML/CSS
Databases/ Data Warehousing : MySQL, PostgreSQL , SQLite ,Snowflake
Tools/ Frameworks: Tableau, Power BI, Streamlit, GitHub, OpenCV, TensorFlow Lite, YOLO ,Kafka ,Pathway
AI / ML & Agentic Systems: Machine Learning, Deep Learning, Multi-Agent AI, Agentic AI, LangChain, LangGraph
IoT / Industrial AI: IoT Sensors, Digital Twins, TinyML, Predictive Maintenance

ADDITIONAL INFORMATION

- Languages:** English, Tamil
Certifications: Deep Learning, Data Analysis with Python - CognitiveClass.ai
Sports Achievement: State-level Kho-Kho Player-- Represented at state competitions
